## **PREPARATION FOR USE**

### **General**

- Always inspect the appliance before use to ensure the foils are free from hair, debris etc.
- Always ensure hair is clean and dry before shaving.

## **INSTRUCTIONS FOR USE**

### **Charging the Appliance**

- Before using the appliance for the first time, charge the battery continuously for 3 hours. Maximum battery capacity will only be reached after 3 completed charging and discharging cycles.
- Plug the charging adapter into a suitable mains power socket and switch on. The blue LED indicator light will flash when correctly

connected to the mains power and will continuously flash until the battery has fully charged. When the battery is fully charged the LED indicator light will stop flashing but remain on.

**NOTE:** Before charging, ensure the shaver switch is in the (0) OFF position.

- When the shaver is running low on charge, the LED indicator light will flash, warning there is approximately 3 minutes of battery use remaining. A 3 hour charge will provide approximately 180 minutes use. A 30 minute quick charge will provide approximately 30 minutes use.
- If the charging light starts to flash rapidly (more than 4 flashes per second) then the appliance is faulty. If this happens then please stop charging and remove the adapter from the mains and contact the Conair Customer Care Line. (See 'UK After Sales Service' section for further information).

### **Preserving the Batteries**

- In order to maintain the optimum capacity of the rechargeable batteries, the appliance should be recharged for 3 hours approximately every 3 months.
- Using the shaver on the mains - ensure that the shaver is switched off. Plug into a suitable mains socket. Wait for approximately a minute, and then switch on.

**IMPORTANT:** Do not use the shaver in this mode for more than 20 minutes.

### **Oiling Instructions**

- For optimum cutting performance, it is highly recommended to oil the cutting blades after every use.
- When using the oil for the first time, unscrew the cap and cut off the very end of the plastic tube with a pair of scissors.
- Remove the foils and switch the appliance on.
- Holding the shaver at a 45 degree angle, gently squeeze the oil tube and apply 1 drop directly onto the cutter blades.
- Leave the unit on for a further few seconds to allow the oil to thoroughly spread along the length of the blades.

- Switch off the unit and remove any excess oil by gently dabbing with a cloth before using on hair.
- Replace the foils over the cutting blade.

### **Shaving**

- The shaver is designed for a close cut on hair shorter than 1/32". If hair is longer, use a trimmer to shorten the hair prior to using the shaver.
- Remove the protective cover and turn the shaver on using the switch on the side of the unit.
- Hold at a right angle and move the shaver slowly and smoothly against the grain of your beard.
- Short, circular strokes will help to make the hairs stand out and make shaving easier.
- The foils should glide over the skin. Ensure not to apply too much pressure or this may cause damage to the foils.
- Turn the unit off using the switch on the side of the unit.
- Thoroughly clean the hair from the foils and the cutting blade to ensure shaving comfort during next use.

### **CLEANING & MAINTENANCE**

- To maintain optimum performance, the appliance should be cleaned after each use.
- Never press on the cutting blades or the shaving foil as this can cause irreparable damage.
- Blow any remaining hair from the foils and cutting blades or use the cleaning brush provided.
- Ensure that no water gets inside the unit to avoid damaging the shaver.
- When cleaning, do not apply any detergents and do not use any abrasive or sharp objects. They can cause irreparable damage to the shaver.
- To clean the external surface of the shaver, use a damp cloth. Do not use strong detergents or other chemicals.
- To dry, wipe the surface of the shaver with a dry towel.

### **REMOVE & REPLACE THE FOIL HEAD ASSEMBLY**

- Remove the foil head assembly by pressing the round release button located on the side of the shaver. Hold the foil head assembly on both sides and lightly pull away from shaver unit.
- Align the replacement foil head assembly over the cutters. Carefully move the replacement foil head assembly down towards the shaver unit until it firmly snaps into place.  
**CAUTION!** Be careful not to damage the foils or cutter blades whilst installing.

### **REMOVE & REPLACE THE CUTTER BLADES**

- To remove cutters, place your fingers on each side and gently pull up and away from the drive shaft.
- To replace cutters, align cutter above the drive shaft and lightly push down until it snaps into place.
- Replace the foil head assembly, turn shaver on to ensure it is working properly.
